HIGH MAST INSTALLATION

HIGH MAST INSTALLATION

High mast lighting is the most efficient method of lighting large areas with the minimum number of obstructions. CU Phosco® Lighting are the world leaders in high mast lighting, we have achieved this distinction by continuous development, investment, and innovation. Our experience is unequalled in the number of high masts we have made and the many different situations in which we have installed them over the past 50 years.

CU Phosco® Lighting offers customers who require it a complete turnkey package. We will: -

- Design the lighting scheme
- Check that all equipment to be supplied conforms to the client specifications
- Design and construct the foundations
- Design and install the electrical supply
- Manufacture the High Masts and luminaires
- Deliver the equipment
- Assemble the equipment
- Install the equipment, including any electrical connections required
- Commission the equipment to confirm that the specification has been achieved.

All of this is undertaken by our qualified and competent in-house team with many years of experience in the specialist skills required for high mast installation.

CU Phosco® Lighting are a NICEIC and HERS Approved Contractor. We are capable of completing the whole job or parts of it, dependent on client requirements. In many cases worldwide where our customers needed help, we have supplied skilled personnel to supervise local operatives undertaking the installation and commissioning of high mast schemes.
